NEJIN GEORGE

B.Tech Electrical & Electronics Engineering Student

Kerala, India | Phone: +918589882506 | Email: nejingeorge@gmail.com | LinkedIn: https://www.linkedin.com/in/nejin-george-b4b539326?utm_source=share_via&utm_content=profile&utm_medium=member_android |

PROFESSIONAL SUMMARY

Electrical and Electronics Engineering student at Amal Jyothi College of Engineering with interests in power systems, embedded electronics, sensors, microcontrollers, and practical engineering problem-solving. Has explored Arduino-based measurement, sensor systems, renewable-energy forecasting, and monitoring concepts, and completed industrial training at a 220 kV substation in Kanjikode, Palakkad.

EDUCATION

B.Tech, Electrical & Electronics Engineering
Amal Jyothi College of Engineering, Kerala | Currently pursuing

TECHNICAL SKILLS

Electrical: Electrical machines, power systems, transformers, motors and generators, circuit analysis
Electronics & Embedded: Arduino, embedded C, sensors, RF modules, analog electronics, digital logic, microcontrollers
Software & Tools: MATLAB, Python/pandas, C/C++, HTML, CSS, JavaScript, VHDL, Arduino IDE, KiCad, Proteus, Fusion 360, AutoCAD

PROJECTS

Wireless Frequency Meter (Arduino/RF concept)
Explored frequency capture using an Arduino Uno and wireless transmission of readings through 433 MHz RF modules.

Solar Power Generation Forecasting
Project concept using MATLAB and spreadsheet workflows to explore forecasting from historical and environmental data.

Magnetic Field Detection
Explored Hall-effect sensors and microcontroller-based reading of magnetic-field changes.

Sewage Treatment Plant Monitoring
Funded project focused on sensor-based monitoring of key treatment-plant parameters and abnormal-condition alerts.

Driver Anti-Sleep Detection & Lane Assist
Driver-safety system concept combining drowsiness monitoring and lane-departure alerts.

Landslide Rescue Rover
Smart India Hackathon project concept for assisting rescue teams with inspection of difficult terrain.

INDUSTRIAL TRAINING

Industrial Training — 220 kV Substation, Kanjikode, Palakkad | 7 days

- Observed 220 kV and 110 kV switchyard arrangements and feeder connections.
- Learned about power transformers, cooling fins, conservator tanks, and breather systems.
- Explored the 110 kV / 22 kV transformation stage and major substation equipment functions.

SELECTED CERTIFICATIONS & ACTIVITIES

3D Printing Workshop • Agnirva AI Online Internship • IEEE PES Event • IEEE Skyborn Robotics • NASA Space Apps Challenge • WSSET Certificate • National Conference • KSEB Industrial Internship • Smart India Hackathon — Shortlisted / Participation • NASA 2025 • Google Solution Challenge • PCB Designing & Fabrication Workshop • ESG Processes with Sustainable Technology • Cybersecurity Analyst Job Simulation • Arduino Master Class • Azure 2025 Volunteering • Introduction to Python Programming • Mastermind • OSHA • Drawing Club

Before submitting: add your phone number, email and LinkedIn URL; verify certificate titles and dates.
